

Letter from Alyssa Molina, MD, MPH

Nearly 12 years ago I was very blessed to begin working at Rice Medical Center and Rice Medical Associates. Over these years I have been given the privilege to get to know so many of the wonderful citizens of Colorado County and the surrounding areas. I have worked with incredible physicians, nurses, administration, and support staff. Through these relationships, I have grown remarkably as a physician and a person. I have always had the goal of sharing the knowledge that I have gained with new physicians to help them become the kind of primary care doctors that we all need.

An opportunity has arisen for me to follow that dream and join the faculty of a residency program in Conroe. I am very excited for the chance to help recent medical graduates develop into amazing family doctors; however, this is a bittersweet moment. I am very sad that taking this opportunity means saying goodbye to a practice that I have loved.

Rest assured, the team at Rice Medical Associates and Rice Medical Center will be here to care for your family needs. Drs. Thomas, Cantu, Penick, and Janish are excellent physicians. Cassandra Carmon, Rhonda Morrow, and Jennifer Wegenhoft are exceptional advanced practice providers. Your family is in great hands!

Your electronic medical records will be maintained at 610 S Austin Rd, Eagle Lake, TX 77434; they are confidential and can be released only through your permission. A copy of your records can be transferred to another facility, and/or released to you or another person if you so designate in writing. If you plan to continue with one of our Rice Medical Associates providers, your records can be accessed through our shared Electronic Medical Records system. If you choose to see a different provider, please contact the clinic at 979-234-2551, request an Authorization for Release of Information, and return the completed form to the office. Please allow appropriate time for our office to prepare your medical records.

My last day in Eagle Lake will be May 31, 2022. I have truly treasured my time here and am sad to go. May God bless each of you.

Sincerely,

*Alyssa Molina, MD MPH*
